LETTERS TO THE EDITOR

The Collegian welcomes your letters to the editor. They can be submitted by email to letters@spub.ksu.edu, or in person to Kedzie 116. Include your full name, year in school and major. Letters should be limited to 350 words. All submitted letters may be edited for length and clarity.

CORRECTIONS

There were errors in the Nov. 15 issue. Candi Hironaka’s parents were interned in a prison camp in the U.S., not interred as stated on page 8. The Electoral College was made a part of the U.S. Constitution in 1787, not 1776 as stated on page 4. The Collegian regrets the errors. If you see something that should be corrected or clarified, call managing editor Caroline Sweeney at 785-532-6556 or email news@spub.ksu.edu.

K-State professor is plant pathologist by day, blues purist by night

Haley Rose
staff writer

Editor's Note: This is part four of an eight part series highlighting each member of the Red State Blues Band.

Sitting relaxed and casual in a sun-lit alcove on the fourth floor of Throckmorton Hall, Bernd Friebe could pass as a professor like any other — the quintessential intellectual, passionate about what he does and full of information.

While Friebe is all these things and more, he is no more average than a three dollar bill.

A research professor in plant pathology, Friebe is a down-to-earth blues man with a purist's heart and a surprising history.

About eight years ago, a few curious eyes noticed Friebe carrying his guitar through Throckmorton, en route to help a colleague's daughter learn how to play. The curiosity led to inquiries, and a combination of departmental parties, jam sessions and word-of-mouth, eventually led to the formation of the Red State Blues Band — a band consisting entirely of K-State faculty and staff.

The band began with Friebe and his guitar and gradually spread, ending up with eight band members across five K-State departments.

"Bernd kind of drives the band," said John Fellers, adjunct associate professor of plant pathology, colleague of Friebe's and fellow bandmate. "He's an incredible talent, both musically and scientifically. He's one of a kind," Fellers said.

Fellers was originally invited by Friebe to sing for the band after being overheard "blaring blues in the lab," but joined on doing sound engineering for a while before participating as a vocalist.

Both Friebe and Fellers work in plant genetics and disease resistance.

"Bernd is a world-renowned scientist in what he does," Fellers said, "He breaks up the chromosomes and adds them to wheat plants to create disease resistant plants."

People from all over the world send samples of wheat to Friebe and the plant pathology department to develop into disease and pest resistant strains, tailor-made to the specific needs of the region or environment.

"I love my work," Friebe said. "I love it."

Friebe began playing guitar 40 years ago, during his childhood in West Berlin.

"The Berlin Wall was built when I was 12 or 13," he said. "When I was little I remember people jumping out of windows trying to get over the wall and they would get shot, or they would try to build tunnels. It was a mess."

Friebe's parents owned a tobacco shop facing the street that the wall was built on.

"The street was divided. One half East, the other half West. It was right there," he said.

While living in West Berlin as a kid, he picked up the guitar

around the age of 17 and has never put it down. Beginning with lessons in classical music and forming a distaste for the style almost immediately, Friebe took up blues and learned to play by listening to records.

"At that time I was into musicians like Peter Green, Clapton and the like," he said, "I also listened to the old greats like Muddy Waters and B.B. King. I have loved blues from the beginning."

After earning three degrees from the Free University of Berlin, Friebe began teaching in Berlin and started a project called "Dr. Friebe's Blues Band."

"It was a pretty strong band in the '80s," he said. "Half the band needed the money to support their families, so we played a lot of gigs."

After a time in Berlin, Friebe left to go to Munich, where he began teaching and getting into wheat research. A few years later, he came to K-State for a six-month period to continue his work on wheat research in the late 1980s after taking a year-long sabbatical in Winnipeg, Canada.

"K-State is the best place to work on wheat," he said, "Nothing comes close."

After seeing the program and the "productive team" here, he decided to stick around and has been here for more than 22 years.

Before forming the Red State Blues Band, Friebe worked on another musical project that began as a blues band, but after two years shifted to a more "country music style."

"When it turned to country, that is not for me," he said, "I was just ... no."

As a part of the current project, Friebe takes dedication to a new level by sticking to his purist style.

"They call me 'The Evil,'" he said, "or Mr. Death."

His nicknames stem from his ardent insistence that the style of the band not stray into a more contemporary, jazz/blues hybrid like many blues bands today, or into a country style like the last time around.

"I've always known him as The Evil," Fellers said, "He signs things off as The Evil."

Playing on a Les Paul and Firebird, Friebe is a strict Gibson man and, just as he sticks to his style, he sticks to his guitar preference. He also owns a slide guitar, vaguely similar to the shape of the "flying-V" that was custom made for him by a former bandmate when he left Berlin.

The band plays a variety of blues ranging from covers to originals. Some of the songs the band plays are improvised collaborations between the band members. During practices, members may introduce a new guitar riff, which the rest of the band will build on and form a new song.

"There's a lot of talent, everyone just brings so much to the band," Fellers said.

Others are written by individual members and brought to the rest of the band as a complete idea.

Tommy Theis | Collegian

Bernd Friebe, guitar player for the Red State Blues Band and research professor in plant pathology, plays his guitar near his office in Throckmorton Hall. Friebe mostly works with wheat genetics here at K-State.

"This music, it's very emotional stuff," Friebe said, "It doesn't come from the brain, it's not an intellectual thing. It comes from the heart or below the belt."

From growing up in a city that personified the global tension of the era to living in Kansas as one of the world's leading wheat researchers, Friebe has come a great distance over the years, all the while maintaining and remaining true to one of his first and greatest passions — the blues.

Wildcats prepare to take on Texas Longhorns this weekend

Bill Snyder speaks at a press conference earlier this year. The Wildcats will play the No. 23 Texas Longhorns this coming Saturday at 7 p.m. in Austin, Texas.

Sean Frye
staff writer

As the Wildcats enter the home stretch of their magical season, the main goal of the team is to stay focused on the task at hand, and that is to beat the Texas Longhorns for the fourth time in a row on Saturday in Austin, Texas. Head football coach Bill Snyder as well as center BJ Finney and defensive back Allen Chapman spoke to the media Tuesday about their preparations in Snyder's weekly press conference. "We have to keep doing what we do every week," Finney said. "Hit the reset button, one game at a time, come to practice and work on something every day."

For the eighth time this year, the Wildcats enter Saturday's game as the underdog, as the No. 23 Longhorns are nine-point favorites to win at home following their loss to Missouri. Snyder does his best to keep his team focused on the game and not on who the media picks to win the game, but did recognize the fact that his team performs well when the world is against them. "I think there is something more important than trying to prove them wrong," Snyder said. "That is where I would like to believe their focus is and what their intent is and what they are trying to accomplish. I cannot say that they know how the odds-makers perceive it. If

they are fortunate enough to overcome that, then I think they feel good about it. I think over the years we have probably distorted the odds-makers' vantage point. In other words, we have probably gone against the odds, whatever they were, more times than anyone." The Wildcats are coming off two exciting games. Two weeks ago, K-State suffered a heartbreaking loss to Oklahoma State by a score of 52-45. Then this past Saturday, the Wildcats rallied from a 14-point deficit early in the game and a 10-point deficit in the final six minutes to beat the Texas A&M Aggies 53-50 in four overtimes. The Wildcats have trailed 14-0 in each of their previous three

games, then came back to take the lead. Only against Texas A&M did the Wildcats walk away with a victory. "That is an interesting stat," Snyder said. "It truly is when you think about it. I would hate to think that a magic formula is to fall behind. We need to be better. Bottom line to the whole thing is we need to start better than what we have been the last three ballgames. Good football teams have to have some consistency about them. Part of it is having to start ballgames in such way where you do not fall behind considerably. As everyone says, it is 60 minutes of football. Every player, every fan and every coach would suggest that you need to be good

for 60 minutes. You need to play the best you can play, and coach the best you can coach for the full 60 minutes." There are projected to be nearly or even over 100,000 fans in attendance for Saturday's game, making for a unique atmosphere that the Wildcats have not experienced so far this year. Many teams struggle to deal with large crowds on the road, but the Wildcats are trying their best to not let it phase them. "I think that it will be exciting," Chapman said. "I do not think that it will bother us too much." Snyder also addressed, for the second week in a row, the ongoing child sex abuse scandal at Penn State. Usually one

of the most stoic coaches in the country, Snyder admitted that the allegations surrounding former Penn State defensive coordinator Jerry Sandusky as well as the firing of Joe Paterno shook him up. "I've addressed our football team about it," Snyder said. "It's been a concern for me, a very realistic concern. It's been on my mind since the outset. It's bothersome to me for a variety of different reasons and will be for some time. For me, it's a matter of being able to demonstrate for our players and our coaches what I ask of them, and that is to put things on the back shelf and focus on the task at hand. I need to be able to do that, but its weighed heavily on my mind."

Wildcats look to move to 3-0 on the season tonight

Kelly McHugh
staff writer

K-State women's basketball is scheduled to take on BYU tonight at 7:00 p.m. in Bramlage Coliseum. While the Wildcats had an impressive victory over the Dartmouth Big Green last Saturday evening, winning 54-20, the level of competition will be raised when their second conference game is tipped off tonight. The BYU Cougars will travel to Manhattan for the second of three games on the road that they will play within six days. The Cougars (1-1) played the University of Tulsa on Monday night and won 64-61. Known for their high scoring and ability

to make 3-point shots, BYU went 25-9 last year and are picked to place second in the West Coast Conference. Returning seniors for BYU, Haley Steed and Kristen Riley, are both players the Wildcats should keep an eye on tonight. Steed, BYU's lead guard, scored 24 points in their game against Tulsa, and made a career high of six 3-pointers. While Steed was on fire offensively, teammate Riley, a 6-foot-3-inch forward, led the Cougar's defense and also set a career high of 12 rebounds. The Cougars faced Duke, ranked nationally at No. 8, and while it was a close game, BYU lost 61-55. BYU's high-intensity level

BASKETBALL | pg. 8

Two-minute drill

Mark Kern
sports editor

Soccer:

The USA soccer team won for the second time under new coach Jurgen Klinsmann as they defeated Slovenia 3-2 Tuesday in Ljubljana, Slovenia. Jozy Altidore and Clint Dempsey scored twice in a four minute span to break a 1-1 tie and take a 3-1 lead. The win ends an otherwise disappointing year for the Americans as they finished a disappointing 6-8-3, their worst record since going 7-9-11 in 1994.

MLB:

The American League an-

nounced on Tuesday that the Cy Young winner for the 2011 season is Justin Verlander. Verlander went 24-5 and led the American League with a 2.4 ERA and 250 strikeouts on the season. There are many experts that believe Verlander was so dominant on the season that he should also be the MVP of the league.

UFC:

President Dana White and several prominent fighters sued the New York attorney general and the Manhattan district attorney on Tuesday in hopes that a ban that outlaws mixed martial arts in the state of New York gets lifted. Some of the fighters

included in the lawsuit are Jon Jones, Frank Edgar and Matt Hamill. White eventually wants to host a main event in New York and until this law is overturned, he will not be able to.

NCAAB:

Reeves Nelson of UCLA has been suspended indefinitely for conduct detrimental to the team. Nelson, the team's leading rebounder and scorer from last year, was suspended after a meeting with coach Ben Howland. Howland was disappointed in the energy that Nelson has shown. The Bruins have gotten off to a rough start as they were upset by Loyola Marymount last week.

Wildcats look to avenge early season loss to Iowa State Cyclones

Mark Kern
sports editor

The Wildcats (18-9, 7-6) enter the match against Iowa State coming off of a loss to No. 8 ranked Texas last Saturday in Austin, Texas. The Wildcats were able to win the first set 25-23, but the Longhorns came back to win the next three sets to take the match. K-State will look to get back on the winning track, but another tough opponent stands in their way, as the Iowa State Cyclones will enter the match (20-4, 11-2). The Cyclones have only lost to Texas in conference play, and they swept the Wildcats in three sets when the two teams faced in Ahearn Field House on Oct. 5. In that match, the Wildcats were without setter Caitlyn Donahue,

but were able to stay right with the Cyclones for the entire three sets. Iowa State will be led by Carly Jensen, who averages nearly four kills a set on the season. Jensen is the leader of an offense that features four players averaging over two kills a set. The Cyclones have been especially tough at home, where they have only lost one match all year. The Wildcats come into the match, despite the loss to Texas, having played some of their best volleyball of the season. With the back-to-back victories over the Texas A&M and Oklahoma, the Wildcats put themselves in the tournament discussion. The Wildcats have leaned upon Lilla Porubek as Kaitlynn Pelger continues to recover from her injury sustained against Texas A&M over a week ago. Porubek had a career high 23 kills in the victory over the Sooners and followed that up with 13 kills against the Longhorns on Saturday. The Wildcats will look for her to continue her strong play as they travel to take on Iowa State. The game will help the Wildcats' tournament resume as their 26th ranked RPI will take a boost as the Cyclones enter the game with the No. 2 ranked RPI.

file photo

Lilla Porubek, K-State sophomore outside hitter, blocks at the net earlier this season. The Wildcats will play the Iowa State Cyclones in Ames, Iowa today at 6:30 p.m.

Taco Lucha pleases with food, drinks, colorful atmosphere

“Taco Lucha”
★★★★★
Restaurant review
by **Kelsey Castanon**
edge editor

After much anticipation, taco restaurant and bar Taco Lucha opened its kitchen to costumers Nov. 15. But the food and atmosphere makes it absolutely worth the wait. The restaurant is located behind So Long Saloon in Aggieville and gives off an authentic, Mexican feel. Colorful chandeliers hang from the ceiling and Mexican wrestling masks fill the tiny restaurant. While there are only six seating areas within the restaurant, there are extra tables outside. The outside porch is my favorite area and it plays to the colorful theme with bright furniture and a huge fan and fireplace. Its atmosphere is certainly original - but wait until you try the food.

I wasn't surprised when I first saw the menu, as it serves burritos, salads and tacos. Taco Lucha is owned by the same people as So Long's, so the chipotle raspberry and black bean dip made its way onto the menu.

As an appetizer I ordered the Super Nachos, in which the chips were smothered with queso, pork chili and jalapenos. For a little more than \$7, it was a huge amount of food. I will admit I wished there was a higher pork-to-chip ratio, but I cannot complain. They were absolutely mouthwatering and needless to say, there were none left over.

I tried four types of tacos: the Tinga Taco, the Fish Taco, the Slayer Taco and the Buffalo Chicken Tacos. All were priced between the \$2 to \$3 mark and, considering how much was bundled in the tortillas, it made for a great deal.

The Buffalo Chicken Tacos packed the most flavor, with chicken, buffalo sauce, bacon bits, avocado, cabbage and jalepeno ranch. The most interesting taco was the Tinga Taco, which had a home-made “tinga” sauce made with tomatoes, chilis and sweet and mild spices. The server recommended it, and while I would consider it to be a bit too sweet, those with me thought it was delicious. The Fish Taco was full of flavor, despite it not having much more than tilapia fish and cabbage in it, as was the Slayer Taco, filled with steak, onion, queso and jalapenos.

The person I was with enjoyed the El Mexicano Taco, which was filled with steak and a lot of cilantro. Other costumers around me ordered the guacamole, which I regretted missing out on the

Lauren Gocken | Collegian

Seth Stone, Manhattan resident, serves drinks to customers as they fill the bar and the tables before noon yesterday, Taco Lucha's opening day.

moment I saw it. The service was also great. Our drinks were refilled after every few sips and our food was out after minutes of ordering. Servers even helped each other out with tables when customers were done with their food.

The restaurant held a soft opening last week, in which only drinks were served. Tacho Lucha provides a variety of drink options, including delicious specialty drinks with prices ranging from \$3 to \$6 per glass. But don't overlook the three types of tequilas as well: tequila blanco (unaged), tequila reposado (aged for at least one year for a more complex flavor) and tequila anejo (aged for one to three years, giving it a dark color) that can be taken as shots or in a lime, mango or banana margarita.

You may have to wait in line for an open table, but the food is definitely not to be missed. Should you make your way to Taco Lucha, it will be hard for you to go anywhere else for Mexican food.

Kelsey Castanon is a senior in journalism and mass communications. Send comments to edge@spub.ksu.edu.

Lauren Gocken | Collegian

Robert Burke and Jeremy Lohman, both Manhattan residents, prepare tacos, burritos, quesadillas and more yesterday in the Taco Lucha kitchen, which is adjoined to the So Long Saloon kitchen.

Will ‘Siri’ affect interaction?

Mark Kern
sports editor

With the new iPhone application Siri, the interaction of people communicating face to face may take a hit.

For those unfamiliar with Siri, it is a new application on the iPhone 4S, which launched last month.

The application uses natural language processing to answer questions, make recommendations and perform actions by delegating requests to an expanding set of web services.

For example, if you want to text “hello” to your mom, you can say, “Text mom hello.” Then, it will text your mom hello for you.

With this new innovation, it is now easier to make demands verbally, instead of taking the time to type it out yourself.

This app has started a discussion on whether this will affect how we interact with each other as a society. While there are people who do not believe it will change how we interact with each other, there are people who believe it will have a negative affect on our face-to-face interaction.

Anthony Carillo, of Football Reporters Online, said he believes that with apps like this, our ability to interact with each other in person will definitely decline.

“Absolutely, in society today, people are hiding behind emails and apps and texting, and the personal interactions are slowing

fading away,” he said. “Now people are beginning to interact with phones and instead of actually using your fingers and nails to actually type something, you can just speak it and then it does it for you, this is what is making America lazy.”

However, not everyone shares this viewpoint. Steven Smethers, associate professor of journalism and mass communications, said he does not believe that this specific application will necessarily change the way we interact with each other.

“This app, I believe, is more of a novelty than anything,” he said. “I do not think that it will change human interaction anymore than the text message has. I asked my class how many people would rather ask someone out on a date through a text rather than ask them to their face.”

Smethers said that while this new app will be used a lot, he does not think that the app will have an effect one way or another.

This new application is sure to draw numerous users. It is now easier than ever to get any kind of information you need for whatever topic you need. Despite this fact, it is hard to say that this specific app will change the way we communicate with each other one way or another.

Carillo and Smethers both mentioned that texting is already greatly changing the way we communicate. Siri is just another instance showing how we, as a society, are continuing to develop due to technology.

Weather makes no difference in class attendance students, professors say

Patrick White
staff writer

With the coming of November, the first signs of the foul weather that winter brings have appeared. Traveling to and from class can be a concern when it comes to the change of season, especially with how last week's freezing rain turned into snow. Are the roads safe? Is class attendance affected when the weather gets bad?

According Nathan Vogt, sophomore in agricultural business, the roads are not much of a concern.

“If the roads are cleared then there is no problem getting from home to class,” Vogt said.

He said it is not a problem because the university typically won't hold classes if the roads are not cleared. His main concern if there is class during bad weather is the side-walks, he said.

Anthony Howell, junior in humanities, said that missing class because of unfavorable weather is irresponsible.

“I find the cold months a hassle

because I have to get up earlier to get my truck ready, but if I considered skipping because of the weather, what else would I do instead of going to class?” Howell said, “Class is inside, gym is inside, the difference is you get credit for going to class and going to the gym is self-gratifying.”

Howell said weather is the last thing to be considered when the thought of not going to class arises.

“I think time is the reason I have decided not to go to class in the past,” Howell said. “Rain and snow are no big deal. I really worry if it's icy. I have to sandbag my truck because of how light it is.”

David Fallin, instructor of marketing, said that attendance is not a real problem in his class of about 500 students.

“Nobody skips because it's too cold,” Fallin said. “Rain isn't a problem; snow is only a problem in the spring semester. In the fall semester everyone is on top of getting the roads cleared. In the spring semester we can have out-of-season snow storms.”

Fallin said that if such conditions

existed on the roads, safety becomes a bigger concern than attendance.

“I cannot really blame the students if they do not want to risk it coming to class. I would rather they think of their own safety than try and make it. I do not really see many skipping in any weather,” he said.

Gregory Spaulding, assistant professor of mechanical and nuclear engineering, has a different view of attendance.

“I think there is a relationship between the two, attendance and the weather in the colder months,” Spaulding said, “I have also seen the number of students in class drop on nice days as well. I think there is a sweet spot between the nice, sunny days and the dark, stormy and cold ones.”

Spaulding said that there is one true precursor for attendance.

“If there is an assignment due, rain or shine, the class finds a way to turn it in,” he said. “If I have an exam, everyone shows up for that, regardless. And following that, the first day of class after exams sees a big drop off.”

HOROSCOPES

Libra Sept. 23 - Oct. 22
You should be proud of the many skeletons in your closet. It shows you have had nothing better to do with your time but make some bad decisions. Thank you for making up for all the boring people in the world.

Scorpio Oct. 23 - Nov. 21
News flash: déjà vu is not the Thai dish you had a few nights ago. It's your repeated decision to stalk your ex-significant other via Facebook.

Sagittarius Nov. 22 - Dec. 21
Your inadvertent bluntness was refreshing at first. However, it has now brought you to the borderline of “Real Housewives of New Jersey”-type conversations.

Capricorn Dec. 22 - Jan. 19
It's a good thing you have a few very loyal friends who love you regardless of your god-awful sense of humor. Only true friends could see past such a flaw.

Aquarius Jan. 20 - Feb. 18
While its true you have received quite the exciting fortune via Chinese fortune cookie, your limited grasp of reality led you to believe it. What a scam. Better prepare for the opposite.

Pisces Feb. 19 - March 20
Your subconscious will suddenly turn on you this week as you begin to account for all your actions you've spent so long trying to forget.

Aries March 21 - April 19
Body odor may haunt your chances with your biggest “unicorn” of the opposite sex. However, on the bright side, I think there is an app for that.

Taurus April 20 - May 20
If you've been feeling down on yourself, it may be time to take yourself to the Peters Recreation Complex. Flabby arms and legs are only attractive to the walking dead.

Gemini May 21 - June 20
You lost your originality by stealing the term ‘sweetie’ from a Hallmark greeting card. Think of a less hideous way to address your darling. For the record, ‘darling’ is not an option, either.

Cancer June 21 - July 22
Just because your teacher could be described as a character straight from “Little House on the Prairie” does not mean you can ignore her all class period. Or it does. That book sucked.

Leo July 23 - Aug. 22
Sometimes in order to get your way, you have to be a bit evil. Luckily for you, you're a natural. Congratulations.

Virgo Aug. 23 - Sept. 22
If you're unsure of the recent increase in Manhattan taxis, join the club. They know safe ride – or drunk bus – is free, right? If not, please be the one to tell them.

K-State daily briefs

Karen Ingram
news editor

The final doctoral dissertation of Dilan Paranagama, "Correlation and Variance Stabilization in the Two Group Comparison Case in High Dimensional Data Under Dependencies," will be held Nov. 18 at 10 a.m. in the K-State Student Union 206.

The final doctoral dissertation of Khem Acharya, "Excitation Energy Transfer and Charge Separation Dynamics in Photosystem II: Hole-Burning Study," will be held Nov. 18 at 3:30 p.m. in the Chemistry/Biochemistry Building 209.

Fort Riley will be holding a memorial ceremony for German and Italian prisoners of war buried on post on Nov. 18 at 11 a.m. in the Fort Riley Cemetery. This event is held annually to honor and remember WWII POWs at military installations across the country. More than 600 POW camps were established in the U.S. during WWII, holding approximately 350,000 prisoners, the equivalent of about 35 German divisions. About 4,500 prisoners were held in Fort Riley between 1943 and 1946. After the war, some POWs remained in the area. There are 62 German and 11 Italian POWs buried at Fort Riley.

Roots Cafe in the K-State Student Union will be serving breakfast again beginning on the Monday after Thanksgiving break.

K-State Recreational Services will be building a new climbing wall as part of the rec expansion project. Eldorado Climbing Walls of Boulder, Colo. is expected to begin building the new wall in January and the project will finish during the Spring 2012 semester. Recreational Services is currently accepting applications for climbing wall supervisors. Duties will include supervising safety, teaching climbing classes, maintenance and more. Deadline for applying is Friday, Nov. 18 at 5 p.m. For more information or to apply, visit recservices.k-state.edu or call 785-532-6980.

Group meeting to take place tomorrow

Jakki Thompson
staff writer

A joint meeting between the city of Manhattan, Riley County and Pottawatomie County will take place on Thursday afternoon in the City Commission Room at City Hall at 4 p.m.

At this meeting, the commissioners from Manhattan, Riley County and Pottawatomie County will receive an update from the Wildcat Creek Watershed Area Working Group. There will also be an update from Karen Hibbard of the Manhattan Area Convention and Visitor's Bureau about the Welcome and Visitor's Center.

Contaminated tampons recalled

Karen Ingram
news editor

Kimberly-Clark has issued a recall of about 1,400 cases of Kotex brand tampons after discovering a bacterial contamination on the plastic tubing of one sample. This recall applies to Kotex Natural Balance Security Unscented Tampons, regular absorbency, distributed to Walmart stores in Kansas, Iowa, Missouri, Nebraska, New Mexico and Texas, certain Smith's stores in Utah and Arizona, and specific Fry's stores in Arizona between Oct. 29 and Nov. 2.

The tampons were sold in 18 and 36-count boxes with SKU numbers of 15063 and 15068. The recall was issued after tests found Enterobacter sakazakii in one of the samples. This bacterium can cause health problems including vaginal infections, urinary tract infections, pelvic inflammatory disease or other potentially life-threatening infections.

Women who have been using the product and experience symptoms, such as unusual vaginal discharge, headache, rash, fever, vomiting or abdominal pains should contact a doctor immediately. Women with the product should stop using them and contact Kimberly-Clark at 1-800-335-6839. A list of specific lots recalled can be found at www.fda.gov/Safety/Recalls/ucm279588.htm.

Slam poet Shanelle Gabriel to give free performance

Jakki Thompson
staff writer

Slam poet Shanelle Gabriel will be performing at Radina's Coffeehouse and Roastery in the Leadership Studies building tonight starting at 8 p.m. She is coming to campus through the Union Program Council's Multicultural Committee.

"Slam poetry is one of the purest forms of expressing thoughts and emotions," said Andy Blattner, UPC summer co-chair and junior in industrial engineering.

This event will bring Gabriel's performance "Words and Rhythm of Shanelle Gabriel." There will be brownies, cookies, hot chocolate and coffee served from 8-8:30 p.m.

"Being in a coffee house should make it a more intimate setting," said Laura Oxler, UPC multicultural co-chair and junior in pre-journalism and mass communication. "We decided having it at Radina's would be the best setting for a slam poet to come in and speak."

Oxler said slam poetry is like rapping, but without background music. She said it is so dynamic that it is difficult to specifically hone in on exactly what it is without missing parts of the genre.

On Gabriel's official website, it says she has performed on HBO's "Def Poetry Jam" along with Jill Scott and DMX. The website said when she was diagnosed with lupus in 2004, she decided it would not hinder her ability to be successful as a singer or slam poet. Her debut album "Start Something" won the 2008 Atlantic Alternative Soul Best CD Award.

"This event will open the minds of K-State students," Oxler said. "Students will be exposed to a new art form which is slam poetry. Since we live in the Midwest, we aren't exposed to this as much as the people on the coasts."

UPC will be raffling off three \$5 gift cards to Radina's at the event.

"I feel like this event sells itself," Oxler said. "When people hear 'slam poetry,' it may trigger their intrigue. This should be a really good event, in a personal setting, with Shanelle Gabriel performing."

THRIFTY | Students learn thrifty tricks through games

Continued from page 1

around Manhattan including Walmart and Mr. Goodcents.

More or Less confused some audience members and contestants. Contestants were asked if the prices displayed above certain items were higher or lower in real life. The audience would give their opinions to the contestants, but in several instances the audience and contestants assumed that the price was lower in real life, when in fact it was higher.

After each game, the loser got to spin the prize wheel to win a prize, and each game had multiple winners.

"This was a good reminder of common sense, and it pointed out some useful tips, like shopping alone," said Kirsten Quist, junior in criminology. "I never thought shopping by yourself could save money."

Evert Nelson | Collegian

City of Manhattan to get new website through Hackathon contest

**Balasubramany
Meenakshisundaram**
staff writer

Manhattan residents have a chance to pitch in their ideas toward the new website being developed for the city of Manhattan. Hackathon, a web design contest to bring out the best design for this new website, will take place this weekend.

The contest is a way to bring out the talent of the employees of CivicPlus, a Manhattan-based web development company, according to Kimberly Gerlach, director of marketing for CivicPlus.

“It is an exciting way of showcasing our collective talent and demonstrating our pride in Manhattan,” Gerlach said.

The two-day contest starts at 9 a.m. on Saturday, Nov. 19 and

ends at 4 p.m. the next day, according to Gerlach.

This is the first time a contest like this is happening in Manhattan. The contest itself has been modeled after the Hackathon contest that happened in New York City a few months ago, according to Gerlach.

“We are very excited about bringing a fresh new website to the community,” Gerlach said.

The contest is between six teams. Each team will be comprised of a diverse group of people including executives, programmers, graphic designers and web developers. Gerlach said the outcomes will be judged by a team of city officials and CivicPlus executives.

The work of the teams will be judged based on two criteria: best website design and best functionality. A prize of \$1,000

will be given to the winners in each category. The final product will be a marriage of the best of both the winning teams’ works, according to Gerlach.

Manhattan community residents can pitch in their ideas and suggestions by visiting the website [littleapplehackathon.com](#) or by visiting the contest’s Facebook page.

“All teams will get a packet with all the community feed-

back at 9 a.m. on Saturday,” Gerlach said.

The teams will try and implement the suggestions based on their judgment and try to bring out the best designs possible for the website. Gerlach encouraged all citizens to get their suggestions and recommendations across through the website or Facebook page so that the resultant website will be as the community wanted.

Swine Day to bring researchers from across the country to K-State

Ashley Brewer
contributing writer

The department of animal sciences and industry will be hosting Swine Day 2011 on Thursday, Nov. 17 at the K-State Alumni Center. There will be a variety of lectures from researchers across the country, as well as a technology trade show by the graduation students from K-State.

Participants will include investment companies, bankers, swine production companies and people who supply the inputs, such as housing and medication.

K-State has hosted Swine Day for many years and according to Dr. Steve Henry of the Abilene Animal Hospital, it’s been a long tradition.

“Swine Day is nationally recognized for the quality of Kansas State’s work and the excellence of the Kansas State swine team and graduate students,” Henry said.

Henry said both floors of the center will be filled and all the attendees can visit one-on-one with the graduate students.

The K-State Swine Extension program takes swine nutrition research and works

with producers to facilitate rapid adoption of technology by the industry. The program also works with producers in the area of environmental management of swine facilities.

“There will be presentations by the Kansas State University faculty and what graduation student’s research has been like and how far they have come,” Henry said. “Current Kansas State swine research to help improve net return of a swine business is what the Swine Team will be discussing at Swine Day 2011.”

Henry and the group from Abilene Animal Hospital will speak about the effect vitamin D has on baby pigs and they will show movies, discuss stories and explain how they did their research.

A pork loin lunch will be provided for everyone that attends, as well as a reception with Call Hall ice cream.

The event is free and open to the public, but registration is required. For more information or to register, visit [www.ksuswine.org](#).

BASKETBALL | ‘Cats to take on BYU at home

Continued from page 4

of play is something K-State is aware of, and the team has spent the week preparing for tonight’s game.

When asked what her thoughts were on playing BYU, junior team captain Britany Chambers said, “We know that they barely lost to Duke a couple days ago, and that’s pretty much all we need to know at this point. We played them last year and pulled out a win there, so they’re going to come for revenge; we’re excited.”

During the 2009-10 season the Wildcats traveled to Provo, Utah, where they took on BYU, and won 65-62.

While shooting percentages remained low for the rest of the team during Saturday evening’s game, all eyes were on the transfer from Arizona, senior Tasha Dickey, as she went on to score 20 points and had a strong first season game as a K-State Wildcat. Her words

about teammates were nothing but positive, and Dickey said the coaching staff invests a lot of confidence in their players.

“We played hard, I thought we executed well,” Dickey said about their game against Dartmouth. “We’ve got a lot of stuff we need to work on, but we just keep on moving forward, so it was a good game.”

Dickey had confidence that her team would come out strong and ready for BYU.

“We know they’re a really good team, they’re 3-point shooters so we’ll have to play the three,” Dickey said. “It’s gonna be a challenge but we’re ready for it.”

After their game on Saturday, K-State’s coach Deb Patterson said she knew her team would have to compete at a higher level against BYU, however, she was not worried.

While focusing on the opportunity the team has in playing BYU, Patterson said, “I’m anticipating it’ll be a great game for the Wildcats.”

City commission to issue more than \$10.5 million

Jakki Thompson
staff writer

The City Commission began their meeting Tuesday by talking about an upcoming work session with the Riley County Police Department about how to regulate Fake Patty’s Day.

In the consent agenda, the commission accepted and passed all items. One of the passed ordinances will allow the Sunset Zoo, Manhattan Regional Airport and the Flint Hills Discovery Center to have alcohol for certain occasions on their premises.

The city accepted the proposal of issuing more than \$10.5 million in general obligation bonds to finance seven special assessment projects. The commission also accepted the best bid for selling the notes. More than \$6 million will be spent on nine special assessment and capital projects that will be debt financed.

The commission passed an ordinance for Mayor Jim Sherow and Gary Fees, city

clerk, to finalize a contract between the Shawnee Mission school district and the Sunset Zoo Education Center for audio/visual distance learning equipment.

“I just want to say that I am proud to see that all of the funds for this project were privately fundraised,” said Wynn Butler, city commissioner. “I like to know that this was something they took the initiative to do and I would like to see more of that in the community.”

Prathista International Inc. had a presentation on its economic development application, given by members of the city. This business is expanding to North America from their original locations in India. The commission discussed how members of Prathista have met with members of the city and representatives from the College of Agriculture about the future of their business in Manhattan. Prathista researches organic fertilizers and animal feed supplements.

MISS AMERICA | Pageant queen talks about current agricultural issues

Continued from page 1

to take up farming or continue a family farm," she said. "It is so important."

Another topic Scanlan discussed was the hefty agricultural discussions on a governmental level. Federal budget cuts have impacted the agriculture industry in more ways than just budgetary, she said.

A recent bill passed by the legislature will cut the U.S. Department of Agriculture budget in 2010 by close to \$1 billion, but other laws are being put into place that could hamper farming operations.

Scanlan recalled a Nebraska farmer she met who said the government is considering fining farmers every time their cows fart, because of the CO2 emissions.

Another legal issue she touched on was developing strong farm policy as a safety net for farmers, specifically crop insurance.

"Farming is a risky business," she said. "And we can't really go without it."

Scanlan said she has entertained dreams of working in government when she gets older, hoping to be a lawyer, president and a Supreme Court justice, among others. She said she plans on attending college to study government and politics in the D.C. area, while continuing to spread her message on the importance of agriculture.

Scanlan's visit was part of her speaking tour. K-State was chosen out of those who applied to have

her come and speak on the Miss America website.

The student organization who sponsored the event, Food for Thought, applied K-State as a location on the website and the campus was chosen.

"The students started on this event about six or eight months ago," said Dan Thomson, adviser for Food For Thought and associate professor of clinical sciences. "This isn't a farming or agricultural issue, this is an if-you-eat issue and what the group is trying to do is reach people who aren't necessarily associated with agriculture on a day-to-day basis."

Scanlan grew up as the middle child of seven in a small Nebraska town called Gering, where the population is less than 8,000.

"I grew up in a town where kids hang out at Walmart or drive around on Broadway in circles," she said. "I actually feel a little awkward here. Both of my parents went to KU."

Following Scanlan's speech was a short Q-and-A session. Students in the room and people on Twitter asked questions. The Twitter inquiries were mediated by members of Food for Thought.

After the speech, Scanlan signed autographs for students who waited for them.

"I think it's great that she chose this as her platform because it isn't typical and represents her roots well," said Julianne Jensby, senior in food science and industry. "And it's nice to see someone in her position take this platform."

Evert Nelson | Collegian

Teresa Scanlan, Miss America 2011, talks to a crowd at McCain Auditorium yesterday. Scanlan spoke about agriculture and its impact on America. "Not everybody farms, but everybody eats," is her motto.

Help Wanted

DO YOU have special skills? Maybe you've helped with tech support in your high school or college labs? Perhaps you set up the network for your apartment and nine other roommates? Student Publications Inc. has a part-time position for a Macintosh support person able to start immediately for training. This position would take a holiday break and return early in January for the spring 2012 semester. The tech support team maintains about 50 Macintosh workstations, providing software support as well as performing general hardware maintenance. If you're eager to learn, the team is willing to train. Hours are scheduled around classes primarily Monday through Friday 8a.m.- 5p.m. Pay starts at \$7.25 per hour with the opportunity to advance. Only students currently enrolled in fall 2011 for at least six hours at Kansas State University can be considered. Any experience with Mac OSX design software such as Adobe Photoshop, Adobe In-Design, and networking is helpful but not required. Applications may be picked up in 113 Kedzie, or email wallen@ksu.edu for an application. Return by email or to 113 or 103 Kedzie. Please include your fall 2011 and spring 2012 class schedules. Application deadline is 4p.m. Friday, Nov. 18. We will begin reviewing applications immediately.

Application deadline 4 p.m. Friday, November 18

Firetrucks at Fairchild

Tommy Theis | Collegian

Firefighters were called to Fairchild Hall at approximately 9:45 p.m. yesterday when a gas smell was reported in the building. The smell was determined to be from a rusted sewage pipe, which had begun leaking smelly but harmless gas, according to Steve Shepek, battalion chief for the Manhattan Fire Department. Shepek said maintenance would be called to repair the pipe.

TOP-SECRET FILE

Who is Jenny Quint?

- Media Planner for Vladimir Jones
in Colorado Springs, CO

"Not only did my position at the *Collegian* provide me with hands on experience, it opened the door to my first job at *The Topeka Capital-Journal* as a New Business Development Account Executive. My experience at both papers led me to the position I currently hold at Vladimir Jones."

How did she get there?

She worked as a sales rep for the K-State Collegian!

Now Hiring Sales Representatives. Apply today and start training tomorrow for Spring semester positions.

Final hiring date, Friday, November 18th
